

MRIDUL ANAND

To utilize my academic foundation in programming, data structures, and problem-solving skills to contribute to software development in a technical team and gain practical experience. With my eagerness to learn new technologies, I aim to assist in designing efficient and scalable solutions. My goal is to enhance my technical knowledge by working in a collaborative environment and add value to the organization's growth. I am excited to apply the coding and analytical skills gained through my projects to solve real-world challenges.
